

Comprehensive Care for Joint Replacement Expanded Model

Boost your analytics to achieve clinical, quality and financial goals

- » Understand key metrics across procedures.
- » Identify patterns in utilization and episode spend compared to benchmarks.
- » Conduct what-if analyses to identify opportunities to improve care coordination and reduce Medicare episode spend.

DataGen CJR-XcellenceSM for participating hospitals

Simulated episodes of care: Opportunity analysis

DataGen's opportunity analysis solution enables hospitals to assess how well they are positioned for CJR-X success prior to CMS' release of baseline episode data. Gain critical insights now to compare performance to benchmarks, identify improvement opportunities and get ahead before the CJR-X Model goes live.

Performance monitoring and reconciliation validation

DataGen empowers at-risk hospitals by pinpointing strengths, weaknesses and opportunities within the context of Medicare's payment policy and the CJR-X methodology. With our analysis platform and expert services, you gain actionable insights to understand, inform and drive impactful data-driven decisions.
